

About Contigo®

Contigo products are for savvy consumers who seek solutions to the daily challenges of their active lifestyles. Knowing that on-the-go beverages can be messy and complicated to use, Contigo developed a line of simple, yet functionally innovative, environmentally friendly drinkware to help people face life's daily challenges. The products are stylish, yet resilient; sleek yet strong – the perfect combination of performance and grace. Contigo products give consumers the confidence they need to face the day and pride in knowing that they bought the best of the best.

Contigo recently developed a full line of drinkware featuring revolutionary patent-pending AUTOSEAL® technology that automatically seals between sips, forever changing the on-the-go beverage drinking experience. The products – thermal travel mugs, hydration bottles and kids mugs – are 100 percent leak-proof and spill-proof with superior insulation properties that keep beverages hot or cold longer.

Contigo is passionate about the products they create and believe consumers will be pleasantly surprised by the array of helpful innovations that the brand offers.

Headquartered in Chicago, Contigo is a brand of Ignite, a company with a passion for great products. For more information, visit www.gocontigo.com.
