

go-anywhere mugs No matter where you cart your drink—to work, on the trail, or through the airport—these no-spill containers will keep you from springing a leak. —M.S.

> for environmentalists

You won't find a more eco-friendly choice than the **Aladdin Sustain recycled and recyclable traveler** (\$10; aladdin-pmicom.com), made of 100 percent recycled polypropylene. The mug has double-insulated walls to keep your drink at just the right temperature, and it can fit into any car cupholder.

> for crazy, on-the-go days

You can throw the stainless steel **Contigo Autoseal mug** (\$20; gocontigo.com) in your bag without spilling a drop. The drink holder has a button that seals its lid shut to make it leakproof, and it's vacuum-insulated to keep cool liquids cold for more than 12 hours and hot beverages piping for at least four.

> for do-it-yourself brewing

Want another shot for the road? Take two with the **Planetary Design double-shot French press travel mug** (\$30; liquidplanet.com). Use its filter to make fresh coffee or tea, then store the ingredients for two more pick-me-up cups in the base.
