### contigo®

Contigo® is offering technologically advanced products that can save consumers money while helping the environment, with their new complete line of AUTOSEAL® beverageware that offers no-spill, no-leak convenience for individuals with an active lifestyle.

What happens when they outgrow their sippy cups but they don't outgrow spilling? How about a kids mug they can't spill even if they try? How about a mug that's cool enough for the kids, with the performance moms and dads are looking for? AUTOSEAL® is cooler than a sippy cup, but impossible to spill and 100% leak-proof. Those are pretty bold claims, but they are what AUTOSEAL® is all about.

The AUTOSEAL® Kids Mug is the perfect mug for your 4 to 12 year old. They may outgrow their sippy cups, but they never outgrow spilling.

**Benefits:**

- Patented AUTOSEAL® lid is 100% leak-proof and 100% spill-proof. Lid is also one piece, meaning no loose parts.
- Drinking made easy! Press to sip. Release to seal. AUTOSEAL® automatically seals between sips to ensure no spills.
- Contoured body makes this mug easy to hold for smaller hands.
- Non-skid bottom pad helps keep the mug in place.
- Will hold 9 oz. of your child's favorite beverage.
- BPA FREE. Made with polypropylene (PP) #5.
- Phthalate- and PVC-free.
- Top-rack dishwasher-safe, but hand wash recommended for best results.

After getting one of the Contigo AutoSeal Kids Mugs to test out and review I have nothing but good things to say about it. The only negative that I found with it is that they weren't around when my oldest two children were toddlers. And while it is a great piece of drinkware it is a little over my daughters head at the moment. I have to hold it for her and press the button but she sees what I am doing and tries to do it herself. But I let me friends 5 year old drink out of it (after it was washed of course) and she used it with ease and my friend was surprised it worked so well. For both of us the best part was that the seal literally closes after every sip, so when it is accidentally knocked off the table, like it was during this visit, it won't leak all over the place like a cup with no lid that most kids this age drink out of. I definitely give it two thumbs up and I can't wait for my toddler to get a little more coordinated and be able to drink out of these mugs. I recommend checking out the Contigo's website [here](#) and see all the great products they carry, they are all awesome looking!
