

## New Gadgets That Improve Your Drinks

Wayne shares new kitchen gadgets designed to make beverages better

There are always new products and appliances introduced each year to simplify and improve everything we do. This year I thought I'd share a range of beverage related gadgets ranging from an inexpensive water bottle that doesn't drip to a high-end 'one touch' espresso maker that conserves kitchen counter space. All of these products are on the shelves at department and housewares stores now or will be available in April.

### **Contigo® Autoseal® Martinique Double Wall Water Bottle**

The patented technology of the Contigo Water Bottle prevents spills and leaks. The self sealing lid also offers press to sip drinking – there are no lids to remove and no spouts to open. The 18oz capacity container keeps beverages cold for up to two hours and the double wall design reduces sweating. A handle is also incorporated into the top for clipping it onto bags and gear and the entire bottle is top rack dishwasher safe.

Available for \$12.99 at Target stores and [www.gocontigo.com](http://www.gocontigo.com)
