

AUTOSEAL® Kids Tumblers

Your wee geek may think they're ready for a grown-up cup, but you know better than to risk a grape juice disaster. Make a big deal about graduating them to the AutoSeal Kids Cup. It's sleek and cool and screams Big Kid, but seals tight after every sip.

Spill-proof drinking for the Big Kid set

In the evolution of our drinking vessels, there's a huge gap. We begin drinking directly from the maternal source. Then we move on to bottles, which are great for getting your drink on when the maternal unit isn't around. Once we start getting mobile, we graduate to the sippy cup. But at some point, we declare our BigKid-ness and refuse to drink from that BABY CUP anymore. We're not babies! We're grown toddlers, dude! Drinking out of a sippy cup is so embarrassing. We figure out exactly how many minutes of tantrum it will take to get Mom to break, and thus learn how to get a grown-up cup. We celebrate our grown-up-ness by jumping on the white couch while holding high our glass of victory juice. Boing, boing, oops. Better run away and hope Mom thinks the dog did it.

Never fear, parents with Big Kids. We've bridged the gap in a way that will make you and your Big Kid thrilled. The AutoSeal Kids Cup is cooler than a sippy cup, but impossible to spill and 100% leak-proof. To drink, press the button and sip. When the button is released, the cup automatically reseals itself and is 100% spill-proof. We recommend this cup for ages 4 to 12, but if you're a spill-prone adult, you may want one too! They're perfect for kids on-the-go, in the car, or in school lunches. The AutoSeal Kids Cup has everything, even grippy pads on the bottom to keep the cup from sliding or tipping over easily - not that it would spill if it did! (Bazinga!) And because we care about you and your geekling, we've made sure these cups are BPA-free, phthalate-free, and PVC-free.
