Back to school is "big girl" and "big boy" time. They don't want to take their sippy cups along, though they may still really need them.

That's where the [Contigo](#) Autoseal Kids Mug comes in. It's made for kids 4 to 12 year old. And it's perfect to fill with water and pack in a backpack for snack time or lunch time if your child is at school all day.

My three year old can operate this with no problem but her almost 2 year old sister cannot. You have to be coordinated enough to push the button while sipping from the top drink slot. It's easy to hold because the middle is contoured for little hands.

The Contigo is BPA-free, Phthalate- and PVC-free and safe to wash in the dishwasher on the top rack - which is what we do. It doesn't spill or leak we've found - and we've used it for several months now. Making it a perfect back to school cool supply!
